# Treating hormonally changing skin (Puberty, Pregnancy and Menopause)

Do you know how to confidently guide your clients through the many changes that their skin will undergo as they age? Understanding the role hormones play in the condition of the skin is vital to recommending correct product usage for each client.

- > The role of hormones in puberty.
- > Understand the endocrine system and the effects of the reproductive organs on skin health.
- > Discover the different stages of a woman's reproductive life and cycle.
- > Learn what lifestyle and health factors can accelerate the onset of menopause.
- > The result on the skin of pregnancy.

## Featuring...

Clair Buttery  
International Training  
Manager
